

Have you or a loved one been diagnosed with cancer, a complex chronic condition, or a rare disease?

## About the Employee Benefits Advocate Program

As your employer, we recognize that a diagnosis of cancer, a complex chronic condition, or rare disease for you or a loved one may bring confusion and concern. We now offer as a **free and confidential service**, the Employee Benefits Advocate program, to help guide you through the resources and benefits offered by us and our community. Our program pairs you with a trained, professional advocate who will provide personalized benefit counseling and utilization tips based on your specific coverage, assistance to address financial and practical challenges, and help applying for programs such as Social Security Disability, living expenses, and transportation.

## We Get Results

- 94% of participants reported that the program increased their understanding of the details of their employee benefit plan
- 100% of participants reported that the program helped them get the fullest benefit or value from their employee benefit plan
- 100% of participants reported that they received the fullest benefit or value from their employee benefit plan
- 100% of participants reported that they understood costs associated with treatment and care better
- 100% of participants reported that the program increased their awareness of local community resources, and
- 100% of participants would recommend the program to a fellow employee.
